

**1. But this time it hurts! I perfectly remember the edition of "Border of the Light and Darkness" and yet from this moment they pass this year 3 years. As you can see this time was not lost for you. You have registered another NEKRON third material. Can you say something more about it?**

It is true. Since the release of "Border of Light and Darkness" a lot of time has passed. The first two materials appeared after year after year. The third one had to wait a bit. But finally formed. I finished mixing it literally a few days ago. Although this time I had to record in truly spartan conditions. And spartan temperatures. I think it had a positive effect on the music that was created. He is strict and honest. Cold and extremely atmospheric. The new album is entitled "Psychosis" and contains five compositions maintained in a similar convention as "Border of Light and Darkness". Stylistically and soundly I have remained in my moods. So still it is very dark music. I expose the keys, I changed the vocal so that it matched the lyrics better. It is still slow and dark. Such games I just like the most and in such climates I feel the best. This time, however, I resigned from the instrumental tracks. I leave them to a completely different publishing house.
