

The fourth full length of Filipino DEIPHAGO "Into the Eye of Satan" is a real war armada full of hatred to all that is sacred; eight satanic anthems to glorify Dark Forces.

Uncompromising Black/Death played with lethal fury and Infernal anger of hungry, enraged Hellish beasts and looking for their victims, destroys totally. No breathers here, just pure lethal storm which attacks again and again with the sound that reeks of filth, tar and sulphur. Hard to believe how intensive and malicious this music really is.

Savanok's drumming fucking bashes like some machine gun. In this storm, from time to time, you can notice some anxiously sick guitar solos of Sidap. The Voltaire 666's vocal accompanying the bass, is vomiting out so malicious words, at such a high pace, that it is just totally amazing, really! Hard to believe how destructive this three piece commando is able to be. How much hatred there is, here in this music! I personally prefer more jet black sounds myself, but I still think "Into the Eye of Satan" shall be worshipped by many! LWS.
