

Another gem from the Italian label Metal on Metal. UK`s RISEN PROPHECY is back, after five years, with their second full length album. This is one of the more interesting bands this label has to offer, the label which has a good eye for valuable bands. And RISEN PROPHECY is a valuable band, for sure. It is dynamic thrash metal with a lot of Power influences. Boss Oliver`s powerful guitars keep as amazed again and again, cutting with their razor sharp riffs; solos are just breathtaking, the sound is just overwhelming. Plus, a very distinct vocal turns this material in a really explosive mixture. So the outcome is like this: a very interesting piece of music. And the music from “The Valley of Hinnom” is, indeed, unique. Here, you may find unusually complex songs, it all is perfectly balanced, and every single element is well hearable. The self-complementing instrumentarium of every band member is definitely noticeable. the rhythm section of Ben Olivier Bass and James Chalton is this album`s fuel. It all sounds very clear yet still filthy and rough.  Too, Dan Tyren`s powerful vocal is this album`s bright point. There are no weak points here in this album, it all is just super tight and compact. The songs` amazing atmosphere is abundant with different moods. There are some calm moments, and there are some really wild ones. These 36 minutes of music is not enough, really. We need more. this stuff for maniacs into ICED EARTH, FORBIDDEN or UK`s SABBAT. Yeah, RISEN PROPHECY is cleverly influenced by these bands and they do not copy them mindlessly, oh no! Keep an eye on this talented band as they`ll show you again what they`re capable of! LWS
