

Another black gem secreted by **Under the Sign of Garazel** which firmly reaffirms what Polish black metal stands for. The label has been incessantly carrying the black flame for years, releasing truly worthy, underground bands.

Czarna Ewangelia

consists of eight tracks; truly somber and devilish hymns paying homage to Satan himself. This music is pure black metal and, as required, reeks of sulphur and tar really nice. The sound is rough and the pace slow`ish. It all makes this music quite powerful. Vocals are in Polish and make this album bestially strong. I will tell you that the lyrics are this album`s strongest point, methinks. This stuff is really interesting and suffused with hatred against all that is considered sacred. The grim atmosphere of the music itself strengthens the dark aura embracing all it can reach.

Zima

, the last track on this album is an instrumental one and renders this recording even more dark and gloomy.

Czarna Ewangelia

is one of the most interesting recordings that our underground has brought forth. Get this if you haven't already. This unholy stuff comes very recommended to you all. Necro.
