

Another legendary Chilean band here. This is **SADISM`s Tribulated Bells**(1992), re-released with **The Dark Side** ep (1993) as bonus. A piece of awesome, technical death metal of highest caliber in the vein of old school bands like early

PESTILENCE

(the vocals are very similar to

Van Drunen

`s, hey),

MORBID ANGEL, NOCTURNUS

or

DEATH

. You guys need anything else?I do not. Yes, this stuff is jaw dropping all right. Hard to believe that band wasn't able to succeed a bit more and instead stayed deeply underground and thus unable to compete with the said tycoons.

SADISM

formed in Santiago, Chile in 1988 and scorched the earth with a number of amazing recordings, including

The Sound Tribulated Bells

. To me, this album is one of the best death metal releases, plain and simple. You know what? I am happy these guys are still fighting back and striving to deliver their musical vision to the masses. Despite various ups and downs, hey. They've released seven albums now (their latest **Al Azif**

is from 2017). Support these guys, they deserve it! Get this reedition unless you already have it! recommended!!!!
