Heavily VENOM-inspired, old fucking school metal band from Poland here! Cold Wrath of Mother Earth is what we call a true blast from the past and I can only say I do enjoy what I'm hearing on this full length by ARMAGH. Damn catchy, well-performed and simply good old school metal hymns for everyone who wants to call himself a genuinemetal head! For example, just listen to the Endless Fire track from this album so as to understand what I am blathering about! Damn, this music rules!
